

A SYSTEM AND METHOD FOR SHARING MATCHED INTERESTS WITHOUT DISCLOSING NON- SHARED INTERESTS

Abstract of Disclosure

The present invention involves a new system and process for allowing automatic disclosure of at least one common interest between at least two entities while keeping non-common interests undisclosed or secret from other entities. Further, unlike conventional schemes for disclosing or sharing common interests, such disclosure or non-disclosure of interests is accomplished in accordance with the present invention without the use of a third party, mediation, or trusted agent type application or process for comparing shared or common interests. Consequently, in accordance with the present invention, there is no database, application, process, etc. that is external to any entity to which the interests of that entity is disclosed or revealed for the purposes of determining whether any of the entities interests match those of any other entity.
